Emission/Safety	FCC, CE, BSMI, VCCI

World's smallest high-speed Flash Card Driver

CARD DRIVER for RS MultiMedia Card (RS MMC)

A cross between a card reader and a pen drive, our Card Driver turns any flash memory card into a USB pen drive. Like a pen drive, its compact size makes it more convenient than standard card readers. But using flash memory cards instead of on-board memory makes the Card Driver remarkably more flexible than a pen drive. And with FCC, CE, BSMI, and VCCI approvals, you're assured easy market entry.

We bring 7 years of solid R&D experience to bear on developing new products for your market. Check out our full selection of MP3 players, Bluetooth Headsets and other computer accessories in our online showroom. Or, for more information, contact us today.
